#DONERIGHT IN NORTH CAROLINA

USA-based modular manufacturers, Done Group, announces QSR project

GREENSBORO, NC – APRIL 5, 2018 – Done Group announces quick service restaurant project (QSR) in the southern United States.

Done Group specializes in full room modular units that are engineered and designed to fit specific project requirements. Working in tandem with industry leaders Lochsa Engineering, Fastwalls, Martyn Consulting and Vulcraft, Done Group is creating the Greensboro modular QSR with general contractor Burns & McDonnell. The quick service restaurant will consist of four modules that will travel in sequential order for installation. The modules include full floor and wall finishes, MEP connections, and has been built with a drive-thru and in compliance with current IBC fire codes.

Although each project differs, the standard process includes procurement, such as windows, sheathing and interior fixtures, installation of owner supplies, preconstruction coordination, module production in the factory with quality assurance checkpoints, shipping and installation, architectural tie-ins, attaching centrally located MEP connection and final inspection. “We will be documenting this project from the beginning of our scope until final install,” says General Manager, Darren Barnes.

In addition to a time lapse camera hosted on site, Done Group will have designated team members following the modules through the factory, on the road, and to final installation on site. Marketing Manager Karin Wall says, “We are excited to give a behind-the-scenes look at our process both on our website and on social media.”

The quick service restaurant in Greensboro, NC is scheduled to be fully complete in April 2018.

About Done Group

Done Group is passionate about the construction industry and continuously explore ways to improve and innovate conventional methods. The team has built using traditional methods and prefabrication over the last 30 years which has allowed them to realize the best way to build. Done Group focuses on custom whole room modular construction that does not compromise design or creativity. The modules are manufactured locally, and Done Group collaborates with qualified engineers, architects, manufacturers and qualified sub-trades to provide superior products and services to clients across North America.
